Overview

Review Internal Data Sources

Examples of how we use internal data to inform decisions

Discussion

Review External Data Sources

Demonstration of report building in CARES

Internal Data

Internal Data Overview

- Divisional dashboards aim to streamline programmatic data reporting processes and increase data visibility among sections.
- Enable commonly reported divisional data and indicators to be readily available for programmatic staff, FCPH leadership, and serve as an agency resource for all staff.

Internal Dashboards Metric Examples

Behavioral
Health &
Addiction
Services

**Naloxone
distributed
by zip
code**

Care
Coordination

**CHW
clients and
pathways
created**

Community
Engagement &
Health
Promotion

**CHAT
events by
target area
or health
topic**

Emergency
Preparedness

**COVID-19
clinics
completed,
and
residents
vaccinated**

Epidemiology &
Data

**Data
requests
completed
and reports
published**

Using Internal Data to Inform Decisions

- Streamlined Return on Investment Reporting
- Annual Reports
- Ensures alignment on agency goals and strategic plans

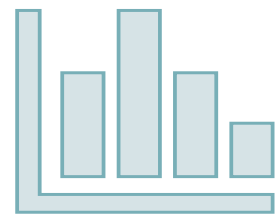

2024 Annual Naloxone Summary

See how FCPH's naloxone program is making a difference

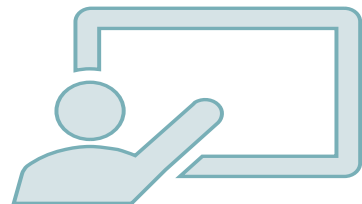

Discussion

What internal data are you currently tracking?

Is there anything missing from your internal data?

How do you currently share internal data? What are additional ways you could share/ use internal data?

What data do you wish you had to evaluate/improve your program?

External Data

External Data Overview

- The Franklin County Comprehensive Addiction and Recovery Evaluation System (CARES) was developed by FCPH using the Conduent Healthy Communities Institute Platform.
- CARES was funded through the Overdose Data to Action (OD2A) grant received by Franklin County Public Health (FCPH) from the Centers for Disease Control and Prevention (CDC), Division of Overdose Prevention (DOP), National Center for Injury Prevention and Control (NCIPC).

External Data Overview

- Franklin County CARES is a public facing website that provides comprehensive data on addiction, recovery, and health for residents and communities in Franklin County.
- Franklin County CARES also provides resources and data-driven strategies to address several health topics including substance use and misuse.

Using External Data to Inform Decisions

- FCPH utilizes data from CARES to supplement internal data when writing grant applications and creating reports.
- Community organizations use data from CARES for grant applications or reporting.
- Indicators that are available at different geographical levels allow FCPH to visualize what neighborhoods are experiencing worse health outcomes and prioritize services.

Using External Data to Inform Decisions

- Used the Stories capability to inform the community about the Overdose Data to Action Grant and the work FCPH is doing related to overdose prevention.
- CARES features a Promising Practices Database to inform professionals and community members about documented approaches to improving community health.

Website Review & Demo

Review what data is available on CARES

Review what data sources are used for CARES

Deep dive of common data topics

Report building demonstration

Deep Dive

Are there any topics you want to look further into?

Deep Dive

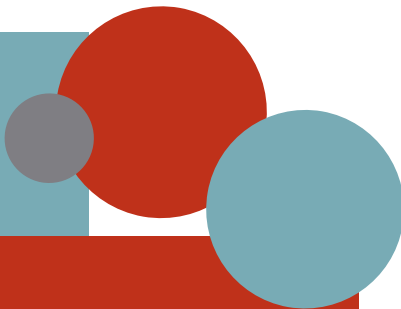

Are there any topics you want to look further into?

Scenario: You are a data analyst working for an organization focused on affordable housing and poverty alleviation in Ohio. You have been tasked with creating a report that summarizes the current state of affordable housing and poverty rates. Which indicators on CARES should be included in this report?

Questions?

Thank you!
