

**Priority outcome: Population health**  
**Small group discussion**  
**Round 1**

**Review the prioritization criteria below and:**

- Summary Assessment of Older Ohioans: pages 7 - 13

**Priority outcome prioritization criteria**

- **Ability to track progress:** Measurable indicators are available to assess and report progress in a meaningful way on an annual basis at the state level, with consideration for the ability to track progress at the local level.
- **Nature of the problem:** Magnitude, severity, disparities/inequities, U.S. comparison, trends [Data and information from Summary Assessment results]
- **Alignment:** With State Plan on Aging, 2020-2022 State Health Improvement Plan, local priorities, state agency plans and other initiatives
- **Potential for impact:** Availability of evidence-informed strategies, co-benefits, feasibility to address at state and/or local level

**Discussion question:**

1. Considering the prioritization criteria above, particularly **ability to track progress** and **potential for impact**, are there other sub-topics that are not listed that we should consider adding? Are there other potential outcomes that are not listed under a sub-topic that we should consider adding?
2. Given the prioritization criteria above, which of the following sub-topics should be prioritized to include in the SAPA? **No final decisions are being made today.**

**Note:** *There will be no more than 1-3 measurable outcomes total for population health.*

Priority outcome: Population health Sub-topics listed below	Potential outcome areas to address within the sub-topic <b>Bold:</b> Measurable outcome included in the <i>Summary Assessment</i> <b>Non-bold:</b> Additional outcome area examples
<b>Cancer</b>	Such as <b>lung, trachea and bronchus, pancreas, colon, breast, prostate</b>
<b>Chronic disease</b>	Such as <b>heart disease/heart failure, hypertension, diabetes, obesity, chronic lower respiratory diseases/COPD, cerebrovascular disease</b>
<b>Mental health</b>	Such as <b>depression, suicide</b> , mental distress, anxiety, post-traumatic stress disorder
<b>Neurological conditions</b>	Such as <b>Alzheimer's, Parkinson's, dementia</b>
<b>Substance use</b>	Such as <b>unintentional drug overdose deaths, excessive drinking, prescription pain use</b>

**Priority outcome: Functional independence**  
**Small group discussion**  
**Round 1**

**Review the prioritization criteria below and:**

- Summary Assessment of Older Ohioans: pages 13 and 14 through figure 3.8

**Priority outcome prioritization criteria**

- **Ability to track progress:** Measurable indicators are available to assess and report progress in a meaningful way on an annual basis at the state level, with consideration for the ability to track progress at the local level.
- **Nature of the problem:** Magnitude, severity, disparities/inequities, U.S. comparison, trends [*Data and information from Summary Assessment results*]
- **Alignment:** With State Plan on Aging, 2020-2022 State Health Improvement Plan, local priorities, state agency plans and other initiatives
- **Potential for impact:** Availability of evidence-informed strategies, co-benefits, feasibility to address at state and/or local level

**Discussion question:**

1. Should this topic name, "functional independence", be framed differently? Potential alternatives: "Preserving independence" or "functional ability"
2. Considering the prioritization criteria above, particularly **ability to track progress** and **potential for impact**, are there other sub-topics that are not listed that we should consider adding? Are there other potential outcomes that are not listed under a sub-topic that we should consider adding?
3. Given the prioritization criteria above, which of the following sub-topics should be prioritized to include in the SAPA?

**Note:** *There will be no more than 1-3 measurable outcomes total for functional independence.*

Priority outcome: Functional independence Sub-topics listed below	Potential outcome areas to address within the sub-topic <b>Bold:</b> Measurable outcome included in the <i>Summary Assessment</i> <b>Non-bold:</b> Additional outcome area examples
<b>Chronic pain</b>	Such as <b>functional limitations due to arthritis</b> , chronic pain and related conditions, ability to manage pain
<b>Falls</b>	Such as <b>falls</b>
<b>Independent living</b>	Such as activities of daily living
<b>Physical/sensory ability</b>	Such as <b>disability status, hearing and vision impairments</b> , mobility impairments, oral health

**Priority outcome: Civic and social engagement**  
**Small group discussion**  
**Round 1**

**Review the prioritization criteria below and:**

- Summary Assessment of Older Ohioans: page 14

**Priority outcome prioritization criteria**

- **Ability to track progress:** Measurable indicators are available to assess and report progress in a meaningful way on an annual basis at the state level, with consideration for the ability to track progress at the local level.
- **Nature of the problem:** Magnitude, severity, disparities/inequities, U.S. comparison, trends [*Data and information from Summary Assessment results*]
- **Alignment:** With State Plan on Aging, 2020-2022 State Health Improvement Plan, local priorities, state agency plans and other initiatives
- **Potential for impact:** Availability of evidence-informed strategies, co-benefits, feasibility to address at state and/or local level

**Discussion question:**

1. Considering the prioritization criteria above, particularly **ability to track progress** and **potential for impact**, are there other sub-topics that are not listed that we should consider adding? Are there other potential outcomes that are not listed under a sub-topic that we should consider adding?
2. Given the prioritization criteria above, which of the following sub-topics should be prioritized to include in the SAPA?

**Note:** *There will be no more than 1-3 measurable outcomes total for civic and social engagement.*

Priority outcome: Civic and social engagement Sub-topics listed below	Potential outcome areas to address within the sub-topic <b>Bold:</b> Measurable outcome included in the <i>Summary Assessment</i> <b>Non-bold:</b> Additional outcome area examples
<b>Employment</b>	Such as <b>unemployment</b> , labor force participation
<b>Social connectedness</b>	Such as <b>social isolation, living alone</b> , leisure activity
<b>Volunteerism</b>	<b>Volunteerism</b>
