Agenda

Welcome and introductions

Conceptual framework – Cost vs. Spending

Dashboard process and review of metric workgroup recommendations

Discussion: Finalizing the 2017 Dashboard metrics

Discussion questions:
1. Do you think the current set of metrics aligns with the Dashboard conceptual framework and tracking progress towards health value? If not, what needs to modified?
2. Do you think the current set of metrics reflects a good balance across the life course? If not, what’s missing?
3. Are there any recommended metrics that you would like to replace with a metric that is currently on the “bike rack”?
4. Are there any data/metric gaps you’d like to include on the wish list? How can we raise awareness through the Dashboard about these data/metric gaps?
